CARE OF YOUR CALCULATOR

Your Prinztronic M500 electronic calculator is a durable, reliable and precision instrument which will provide you with years of trouble free service if used with care.

- * Never subject the calculator to hard knocks, drops and unduly strong key pressing.
- * When calculator is not used for long period, take out the battery to prevent damage from battery leakage.
- * Do not leave a used battery inside the calculator.

FEATURES

- * 8-digit capacity. (7 digits for negative numbers)
- * Full floating decimal.
- * Change sign.
- * Automatic percentage operation.
- * Accumulating memory.
- * Error indication for overflow.
- * Constant and chain calculation.

READOUT INDICATION

OVERFLOW CHECK: Indicated by a continuous "on and off" display of figures.

POWER SOURCES: AC: 9V using recommended AC adaptor – Prinztronic ADX, switch position 6
DC: 9V PP3 battery. This must be inserted as diagram in battery holder, to ensure correct battery polarity.

IMPORTANT Battery must be removed before adaptor is plugged-in.

Because we continually strive to improve our products we may change specifications without prior notice.

6/FUNCTION COMMAND KEYS	CALCULATION EXAMPLES	KEY OPERATION	READ-OUT
-------------------------	----------------------	---------------	----------

C Press once to clear all entries		$\boxed{C} \ 2 \ \boxed{\times} \ 4 \ \boxed{CE} \ 3 \ =$	6
CE Press once to clear last entry			

+ Addition/Subtraction/Multiplication/			
- Subtraction			
\times Multiplication	$16 + 4 - 5 \times 2 \div 5 = 6$	$\boxed{C} \ 16 \ \boxed{+} \ 4 \ \boxed{-} \ 5 \ \boxed{\times} \ 2 \ \boxed{\div} \ 5 \ \boxed{=}$	6
\div Division			

MEMORY

CM Clears memory register			
M- Subtracts the number in the display from the number in the memory	$(6 \times 2) - (8 \div 2) + (3 \times 2) = 14$	$\boxed{C} \ \boxed{CM} \ 6 \ \boxed{\times} \ 2 \ \boxed{=}$ $2 \ \boxed{M-} \ 3 \ \boxed{\times} \ 2 \ \boxed{=}$ $\boxed{M+} \ 8 \ \boxed{\div} \ 2 \ \boxed{=}$ $\boxed{RM} \ 14$	14

M+ Adds the number in the display to the number in the memory	$(2 \times 3) + (4 + 5) + (8 \div 2) = 19$	$\boxed{C} \ \boxed{CM} \ 2 \ \boxed{\times} \ 3 \ \boxed{=}$ $\boxed{M+} \ 4 \ \boxed{+} \ 5 \ \boxed{=}$ $\boxed{M+} \ 8 \ \boxed{\div} \ 2 \ \boxed{=}$ $\boxed{RM} \ 19$	19
---	--	---	----

RM Recalls memory

PERCENT CALCULATION

% Performs percentage calculation including mark-up and discount	Percentage of 58 against 145 = 40%	$\boxed{C} \ 58 \ \boxed{\div} \ 145 \ \boxed{\%}$	40
	20% mark-up of 145 = 174	$\boxed{C} \ 145 \ \boxed{+} \ 20 \ \boxed{\%}$	174
	30% discount of 145 = 101.5	$\boxed{C} \ 145 \ \boxed{-} \ 30 \ \boxed{\%}$	101.5

CONSTANT CALCULATION

The constant factor for multiplication is the first operand; for division the constant factor is the second operand

US\$ 2.35 = £ 1			
Convert the following £ into US			
$2.35 \times £1.78 = US\$ 4.183$		$\boxed{C} \ 2.35 \ \boxed{\times} \ 1.78 \ \boxed{=}$	4.183
$2.35 \times £ 2 = US\$ 4.7$		$\boxed{2} \ \boxed{=}$	4.7
1 meter = 39.36 inches			
Convert the following inches into meter			
$100 \text{ inches} \div 39.36 = 2.5406504$		$\boxed{C} \ 100 \ \boxed{\div} \ 39.36 \ \boxed{=}$	2.5406504
$150 \text{ inches} \div 39.36 = 3.8109756$		$\boxed{150} \ \boxed{\div} \ 39.36 \ \boxed{=}$	3.8109756

CHANGE SIGN

+/- Change positive number in the display to negative number and vice versa

Change:			
$12 - 4$ to $-12 - 4 = -16$		$\boxed{C} \ 12 \ \boxed{+/-} \ \boxed{-} \ 4 \ \boxed{=}$	-16
Change the answer above from -16 to 16 = 16		$\boxed{+/-} \ \boxed{=}$	16
