SPECIAL FEATURES

1. **Advanced LSI Circuitry** — The electronic circuitry is made up of only one LSI (Large Scale Integration) specially developed for this application. This circuit design makes possible unsurpassed reliability and provides for instant calculation of even the difficult problems.
2. **Advanced Decimal System** — The machine is automatically preset to give a two place decimal answer. If a different decimal position is desired you may select from 0 to 4 places by depressing decimal point key and a corresponding numeral key (0–4) at the same time.
3. **LED Display** — These light emitting diodes display clear, easy to read figures.
4. **Zero Suppression System** — Blocks out unnecessary zeros that precede actual figures.
5. **Automatic Clear System** — The machine automatically clears when it is switched "OFF". It is therefore unnecessary to clear before beginning calculation, immediately after switching machine "ON". It is also unnecessary to clear amounts each time between multiplication and division problem.
6. **True Credit Balance** — All negative entries and totals are displayed with red minus sign. (Please see example.)

7. Overflow System — In case of overflow (exceeding 8 digits capacity) the machine indicates EEE... to prevent mis-calculation. Simply depress \square Key to remove the overflow situation. (Please see example.)
8. Constant — Slide selector switch to "K" position, then second entry in multiplication and division is retained as constant. (please see example.)
9. Chain and Mixed Calculations — Calculations such as $A \times B \times C \div D = X$ can be performed without intermediate use of the equal \square key. (Please see example.)
10. Exchange Key — \square Key allows wide calculations such as PERCENT to total calculations, PREMIUM, DISCOUNT, POWER CALCULATION and REPEAT. (Please see example.)
11. Simplified Keyboard — The Keyboard is designed to be easily understood even by beginners. Every key is clearly labeled as to its function.
12. AC/DC Operation — The self-contained replaceable batteries permit convenient portable use and an adaptor is provided with the unit for AC operation in home and office use.

PARTS NAMES & DESCRIPTIONS

<div style="border: 1px solid black; padding: 2px; display: inline-block;">CE</div>	Clear Entry Key:	This is used to clear a wrong entry.
<div style="border: 1px solid black; border-radius: 50%; padding: 2px; display: inline-block;">C</div>	Clear Key:	This is depressed to clear the displayed figures and all the calculations.
<div style="border: 1px solid black; padding: 2px; display: inline-block;">0</div> - <div style="border: 1px solid black; padding: 2px; display: inline-block;">9</div>	Numeral Keys:	Any one of the ten keys displays the same figure depressed.
<div style="border: 1px solid black; padding: 2px; display: inline-block;">.</div>	Decimal Point Key:	Depress to entry decimal point at the proper place when entering amounts with decimals.
<div style="border: 1px solid black; padding: 2px; display: inline-block;">-</div>	Minus Key:	This is used in subtraction. Be careful not to use <div style="border: 1px solid black; padding: 2px; display: inline-block;">=</div> Key to get total.
<div style="border: 1px solid black; padding: 2px; display: inline-block;">÷</div>	Division Key:	This is to be depressed before the divisor is entered in division.
<div style="border: 1px solid black; padding: 2px; display: inline-block;">×</div>	Multiplication Key:	This is to be depressed before the multiplier is entered in multiplication.
<div style="border: 1px solid black; padding: 2px; display: inline-block;">±</div>	Plus/Equal Key:	This is used in addition, multiplication and division only. When depressed, the results of calculations are displayed.
<div style="border: 1px solid black; padding: 2px; display: inline-block;">EX</div>	Exchange Key:	Exchange key reverses dividend and divisor for special applications.
<div style="border: 1px solid black; padding: 2px; display: inline-block;">K</div>	Constant switch:	When Key is set, constant performance in multiplication and division is automatically established.
	Decimal point:	Decimal points are designated at 0, 1, 2, 3, or 4, and can be set by depressing decimal point key and any numeral key you desire to place a decimal at the same time.

OPERATIONAL EXAMPLES

General Information

1. Power Switch "ON".....indicates 0.00
2. For normal calculation, set "K" switch in home position.
3. If a different decimal position is desired, you may select from 0-4 places by depressing decimal point key and a corresponding numeral key (0-4) at the same time.

Examples

ADDITION & SUBTRACTION

EXAMPLE	OPERATION
$11.23 + 12.56 - 3.50 + 13.89 = 34.18$	DPS-2 <input type="checkbox"/> 11.23 <input type="checkbox"/> 12.56 <input type="checkbox"/> 3.50 <input type="checkbox"/> 13.89 <input type="checkbox"/>
$3.78 - 1.325 - 6.55 + 1.555 = -2.540$	DPS-3 <input type="checkbox"/> 3.78 <input type="checkbox"/> 1.325 <input type="checkbox"/> 6.55 <input type="checkbox"/> 1.555 <input type="checkbox"/>

MULTIPLICATION & CHAIN MULTIPLICATION

$1.23 \times 4.567 = 5.617$	DPS-3 <input type="checkbox"/> 1.23 <input checked="" type="checkbox"/> 4.567 <input type="checkbox"/>
$12.5 \times 23.4 \times 32.6 = 9535.50$	DPS-2 <input checked="" type="checkbox"/> 12.5 <input checked="" type="checkbox"/> 23.4 <input checked="" type="checkbox"/> 32.6 <input type="checkbox"/>

DIVISION & CHAIN DIVISION

$1562 \div 22 = 71$ $54321 \div 6 \div 8 = 1131.68$	DPS-0 $1562 \div 22$ DPS-2 $54321 \div 6 \div 8$
--	---

CREDIT BALANCE

$123 + 456 - 789 = -210$ $20 \times 15 = -300$ $20 \times -15 = -300$ $25 \div -5 = -5$	DPS-0 $123 + 456 - 789$ 20×15 $25 \div 5$
--	---

CONSTANT MULTIPLICATION

$1 \times 360 = 360$ $5 \times 360 = 1800$ $10 \times 360 = 3600$	DPS-0 1×360 5 10
---	--

CONSTANT DIVISION

EXAMPLE-WITH CONSTANT DIVISOR	
123 ÷ 3 = 41	DPS-0 C <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
456 ÷ 3 = 152	123 <input type="checkbox"/> 3 <input type="checkbox"/>
789 ÷ 3 = 263	456 <input type="checkbox"/>
	789 <input type="checkbox"/>

MIXED CALCULATION

EXAMPLE	OPERATION
5 × 6 ÷ 2 + 8 = 23	DPS-0 C 5 <input checked="" type="checkbox"/> 6 <input type="checkbox"/> 2 <input type="checkbox"/> 8 <input type="checkbox"/>
$\frac{7 \times 8 \div 4 + 8}{2 \times 3} = 3.6666$	DPS-4 7 <input checked="" type="checkbox"/> 8 <input type="checkbox"/> 4 <input type="checkbox"/> 8 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/>
8 ÷ (5 + 3 - 6) = 4	DPS-0 C 5 <input type="checkbox"/> 3 <input type="checkbox"/> 6 <input type="checkbox"/> 8 <input checked="" type="checkbox"/> <input type="checkbox"/>

PREMIUM

Cost Price \$100.00	DPS-2
25% Profit..... ? $0.25 \times 100 = 25$	0.25 <input checked="" type="checkbox"/> 100 <input type="checkbox"/>
Sales Price..... ? $100 + 25 = 125$	<input checked="" type="checkbox"/> EX <input type="checkbox"/>

DISCOUNT

List Price \$ 100.00	DPS-2
15% Disbount..... ? $-0.15 \times 100 = -15$	0.15 <input checked="" type="checkbox"/> 100 <input type="checkbox"/>
Sales Price..... ? $100 - 15 = 85$	<input checked="" type="checkbox"/> EX <input type="checkbox"/>

HOW TO FIX LIST PRICE

Cost Price..... \$75.00 $75 \div (1 - 0.23) =$	DPS-2
97.40	1 <input type="checkbox"/> 0.23 <input type="checkbox"/> <input type="checkbox"/>
Add 23% Profit to List Price	75 <input checked="" type="checkbox"/> EX <input type="checkbox"/>
List Price..... ? $97.40 \times 0.23 + 75 = 97.40$	97.40 <input checked="" type="checkbox"/> 0.23 <input type="checkbox"/> 75 <input type="checkbox"/>

PERCENT

$30 = 15\%$ $30 + 50 + 120 = 200$ $50 = 25\%$ $30 \div 200 = 0.15$ $50 \div 200 = 0.25$ $120 = 60\%$ $120 \div 200 = 0.60$ $200 = 100\%$	DPS-2 \square \square $30 \pm 50 \pm 120 \pm$ $\pm 30 \text{ [EX]} \pm$ $50 \pm$ $120 \pm$
--	--

REPEAT ADDITION & SUBTRACTION

$111 + 222 + 222 + 222 - 222 = 555$	DPS-0 $\text{[C]} 111 \pm 222 \pm \text{[EX]} \pm \text{[EX]} \pm$ $\text{[EX]} \pm$
-------------------------------------	--

POWER CALCULATION

$2^4 = 16$	DPS-0 $2 \times \text{[EX]} \times \text{[EX]} \times \text{[EX]} \pm$
------------	---

OVERFLOW

OPERATIONAL EXAMPLE	RESULT
Attempt to Enter Nine Digit 1 2 3 4 5 6 7 8 9 To clear overflow condition depress <input type="checkbox"/> key	EEEE 0.00 0.00

BATTERY

Preparation for use.

Battery power.

Open the cover of the battery compartment on the bottom of the unit and insert a battery to match the polarity as per drawing. Close the cover and slide the power switch "ON".

Note: Plug out when using battery.

AC power.

This calculator can be operated from the home power by using AC adapter. In case of using AC adapter, Please take care to slide the power switch to the "OFF" position.

MAINTENANCE INSTRUCTION

This calculator is made up of precision parts such as LSI. Radical changes in temperature or humidity can be harmful. The following points must be carefully noted.

1. Do not drop or jar the machine.
2. Always be certain machine is switched "OFF" when not in operation. This will prevent unnecessary drain on the batteries.
3. Long hours of direct heat rays from the sun or an appliance must be avoided.
4. When cleaning the machine, use a neutral cleaner. Do not use a wet cloth or liquid such as paint thinner.
